

Gifted Education Projects and Initiatives at the Institute TIBI / KPH Vienna

The concept of TIBI is based on a dynamic definition of giftedness, which focuses on a professional handling of different performances and achievements in different learning environments and which takes Christian values into consideration.

- **Accredited European Talent Centre**
- **Teacher training courses in the field of gifted education:**
 - **Masters programme (M.A.)**
 - **ECHA-Diploma courses**
 - **Seminars & lectures**
 - **School development programmes & seminars**

Gifted education is a basic pedagogical attitude, which aims at the development of the different talents and gifts (intellectual, cognitive, social, emotional) of all human beings and which therefore contributes to a general personality development. TIBI integrates value discourse as a dimension of an ethically responsible education of the gifted.

- **National and international cooperations with university colleges & institutions that focus on the promotion of giftedness and gifted education**

The Institute TIBI offers various courses and advanced training programmes, in which experts from Austria, Germany and Switzerland cooperate. Together they link scientific knowhow and practical experience.

For other projects we cooperate with many other European countries, among them: Poland, Italy, Hungary.
- **Transnational project: "Mentoring the Gifted" at tertiary level (TIBI and Wroclaw School of Banking/Poland)**
- **Research projects: e.g. "Gifted Education & Migration"**

Austria has always been a hub of gifts and talents. Our project researches successful education paths of migrants and encourages the discourse on successful integration strategies.
- **Counselling for teachers, parents and students concerning all questions of giftedness and high ability**
- **Conference organisation & management**
- **Various publications**
